

# Leonardo Gonzalez

## Google Cloud Architect & Workspace Specialist

info@leonardojaaziel.com · leonardojaaziel.com · linkedin.com/in/leonardojaaziel · github.com/titobrenes123 · El Salvador · English / Spanish

---

### PROFESSIONAL SUMMARY

---

Google Cloud certified Architect & Engineer with 5+ years designing, deploying, and operating cloud infrastructure and Google Workspace environments for businesses across North America and Latin America. Shipped 80+ engagements spanning GCP architecture, Workspace migrations, email deliverability, serverless data pipelines, and Gemini AI integrations. Bilingual (English / Spanish) consultant operating hands-on across the stack — from Admin Console to Compute Engine to BigQuery — with a bias for reliable, observable systems that quietly do their job.

---

|                             |                                                                                                                                                                                                                                                                     |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Cloud Architecture</b>   | Google Cloud Platform (GCP), Compute Engine, GKE, Cloud Run, Cloud Functions, App Engine, Cloud Storage, IAM, VPC networking, Cloud Monitoring & Logging, cost optimization, hybrid & multi-cloud planning, reliability engineering, infrastructure-as-code.        |
| <b>Google Workspace</b>     | Admin Console, identity management & SSO, Gmail administration, deliverability (SPF / DKIM / DMARC / BIMI), Chrome Enterprise & ChromeOS device management, shared drives, multi-domain environments, M365 → Workspace migrations, compliance & security baselines. |
| <b>Data &amp; AI</b>        | BigQuery, Firestore, Firebase, Vertex AI, Gemini, Dialogflow CX, conversational AI, AI-assisted analytics pipelines, Firestore → BigQuery streaming, Cloud Functions data transforms.                                                                               |
| <b>Programming</b>          | Python, SQL, JavaScript / TypeScript, Node.js, Apps Script, REST API integrations, Bash / Linux administration.                                                                                                                                                     |
| <b>DevOps &amp; Hosting</b> | Firebase Hosting, GitHub Actions CI/CD, container deployments, DNS management, observability, production troubleshooting, performance tuning.                                                                                                                       |
| <b>Languages</b>            | English (professional working proficiency) · Spanish (native).                                                                                                                                                                                                      |

### PROFESSIONAL EXPERIENCE

---

- ▶ Founded and operate a Salvadoran cloud & Workspace consultancy serving SMBs across North America and Latin America. **80+ engagements delivered to date.**
- ▶ Lead end-to-end Google Workspace deployments and Microsoft 365 → Workspace migrations including DNS cutover, SPF/DKIM/DMARC reauthentication, identity sync, ChromeOS rollout, and end-user enablement.
- ▶ Design and ship GCP infrastructure — Compute Engine, Cloud Run, Cloud Functions, BigQuery, Firestore — with attention to cost, reliability, and operational simplicity.
- ▶ Built and operate Guanacos Tech's bilingual marketing site, blog, and admin lead-management dashboard on Firebase Hosting + Cloud Functions with hardened Firestore Security Rules.
- ▶ Specialize in production rescues: stalled Workspace migrations, collapsed deliverability, and drifted cloud infrastructure that has outgrown its original owner.
- ▶ Operate bilingually (English / Spanish) across both North American and LATAM timezones.

**Independent Cloud Consultant** · Contract engagements

2020 – Present · Remote

- ▶ Deliver architecture reviews, Workspace administration, and AI-integration builds to clients via direct contracts and via consulting marketplaces (Fiverr, Upwork).
- ▶ Author technical writeups, architectural recommendations, and remediation plans for production cloud and email systems.
- ▶ Build Apps Script & Firebase web apps that document client engagement activity into CRM systems (Salesforce, HubSpot) with Gemini-assisted content polishing.

**SELECTED PROJECTS**

---

**Dialogflow + BigQuery + Gemini Conversational Assistant**

Cloud Functions · BigQuery · Gemini

- ▶ End-to-end build of a conversational analytics assistant: user prompts hit a Cloud Function, which dispatches parameterized SQL against BigQuery and feeds the result to Gemini for natural-language synthesis returned to the chat surface.

**Microsoft 365 → Google Workspace Migrations**

Workspace · DNS · Mail flow

- ▶ Multi-domain migrations including DNS cutover, SPF/DKIM/DMARC reauthentication, identity sync, ChromeOS device enrollment, shared-drive architecture, and end-user training.

**Firestore → BigQuery Streaming Pipeline**

Firestore · BigQuery · Cloud Functions

- ▶ Cloud-Function-driven export of Firestore document changes into a queryable BigQuery dataset enabling product analytics on production app data.

**Email Deliverability Remediation Engagements**

Gmail · SPF · DKIM · DMARC

- ▶ Diagnose and resolve spam, authentication, and reputation issues affecting production email systems — typically restoring deliverability within a single business week.

**GCP-Hosted Game Servers**

Compute Engine · Linux · Networking

- ▶ Production Minecraft Fabric server on Compute Engine with cost-aware sizing, automated backups to Cloud Storage, firewall hardening, and clean operational tooling.

**EDUCATION & CONTINUING LEARNING**

---

Self-directed Google Cloud certification path. Ongoing study across Vertex AI, Gemini, GKE, and Workspace platform updates. Active participant in Google Cloud Skills Boost & Credly badge programs.
